**HELMETS ARE
TESTED TO DESTRUCTION**

BY THE BRITISH STANDARDS INSTITUTION

TO ENSURE YOUR MAXIMUM PROTECTION

CHINSTRAP TEST

A load up to 100 lbs. is applied to the chinstrap—the vertical movement or "stretch" not to exceed 1 in. 25.4mm.

IMPACT TEST

A block of beechwood giving an impact force of 90 ft. lbs. is dropped from a height on both front and rear of the helmet.

PENETRATION TEST

A steel striker giving a penetration force of 8 ft. lbs. is dropped on the top of the helmet.

These continuous and stringent tests enable us to maintain a very high standard. Our policy is one of continuous research and we reserve the right to change and improve specifications at any time.

Everoak Helmets are manufactured under Licence No. 1537 to comply with the most recent British Standard Specification 2001 and under Licence No. 2642 to comply with the latest B.S.1869.

Wherever you ride — on normal roads or on the track — there is an Everoak Safety Helmet to meet your requirements. Everoak designers have successfully combined comfort and serviceability with up-to-the-minute shape and colour styling to produce the world's most popular range of safety headwear. Made by one of the oldest established helmet manufacturers, who have produced over a million motor cyclist safety helmets. Everoak helmets are scientifically designed to give maximum shock and impact resistance, and manufactured to meet the stringent demands of the British Standards Institution, with cork padding for added protection. The Everoak Racemaster and Everoak T.T. models are specially designed for motor-cycle racing and track use. Both models are A.C.U. approved. All other models are made to the latest B.S.2001 specification.
